

# car2go WEST TRANS

In light of our recent launch within the boroughs of Islington & Sutton car2go would like to propose an extension of our service to include the WEST TRANS partnership under the following assumptions:

- car2go are requesting that the WEST TRANS boroughs consider a pilot scheme to join as one contiguous multi-borough area within West London, or part thereof.
- car2go are willing to engage with each borough as a separate entity to address parking agreements, stakeholder management and price specific challenges.
- car2go would like to propose a launch date WC 29/04/13 to allow sufficient time to address the various borough specific points.
